MONDAY 21 JULY

EV Good evening, Evelyn ✨
2 things waiting today · take the next small step

Biology, Maths +2 ▾

TODAY'S MISSION

Quadratic Equations

A focused guided practice session, personalised for you.
Oli will ask, prompt and challenge.

Oli Bradfield is ready ●

12 QUESTIONS | 20 MINUTES | +2 CONFIDENCE TARGET

[Start today's practice →](#) [Review last lesson](#)

TODAY'S ACTIONS

5 flashcards due
Quick review to build momentum [Revise now →](#)

Next lesson tomorrow
Tue, 22 Jul · 16:00 (60 mins) [View schedule →](#)

NEXT LESSON

Maths – Completing the square
Tue, 22 Jul 2026 · 16:00 (60 mins)
With Oli Bradfield

[View schedule →](#)

PRIORITY

Completing the square
This is your weakest recent area.
Start with a short guided set.

[Practise now →](#)

RECENT PROGRESS

Great start!
Keep the momentum going.

"Consistent small steps. Extraordinary results."

Great tuition should not
end when the lesson does.

Bradfield combines exceptional tutors with
intelligent technology to help students think
independently, follow through and perform
when it matters.

AI can answer any question. We make sure your child can.

🕒 30-SECOND SUMMARY

The Bradfield Tuition App, at a glance.

Short on time? This page gives you the whole proposition: what the app does, who it helps and why it improves tuition.

ONE CONNECTED SYSTEM. THREE CLEAR BENEFITS.

FOR THE STUDENT

CLEAR DIRECTION

Know what to do next, access support between lessons and see how each task fits into the course.

FOR THE TUTOR

BETTER CONTINUITY

See progress, independent work and misconceptions before the next lesson.

FOR THE PARENT

MEANINGFUL VISIBILITY

Receive a live dashboard, weekly updates and lesson summaries without managing every task.

Technology provides continuity. Expert tutors provide judgement, motivation and accountability. The app makes the learning journey more connected, but Oli and Maria remain responsible for the teaching, decisions and progress behind it.

Think independently

Follow through

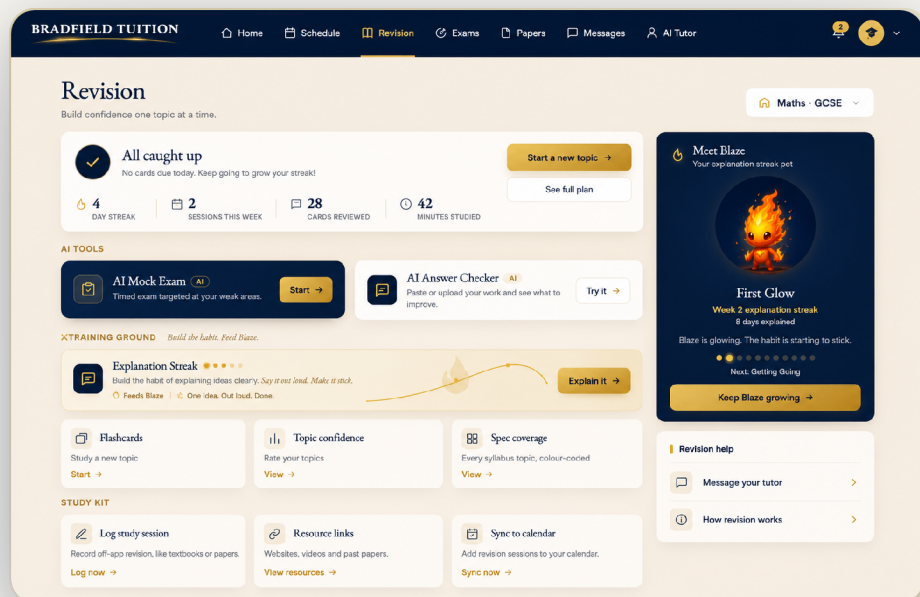

Perform when it matters

Exceptional tutoring. Intelligently connected.

THE STUDENT EXPERIENCE

Independent learning, with direction.

The app gives students a clear next step, purposeful support and feedback they can act on - helping them think independently and follow through.

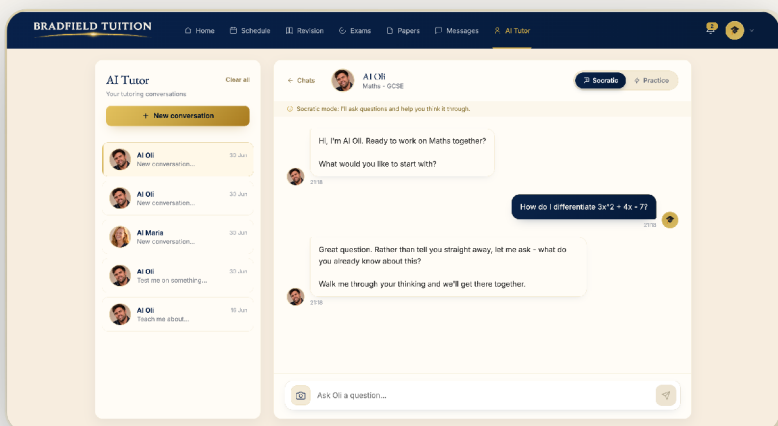

Know what to do next

A personalised revision space brings together priorities, topic confidence, specification coverage and purposeful practice.

Think with support between lessons

AI Oli and AI Maria explain, question and challenge in the teaching style students recognise - supporting their thinking rather than replacing it.

Turn every answer into progress

The Answer Checker shows what was understood, what was missed and exactly how to improve.

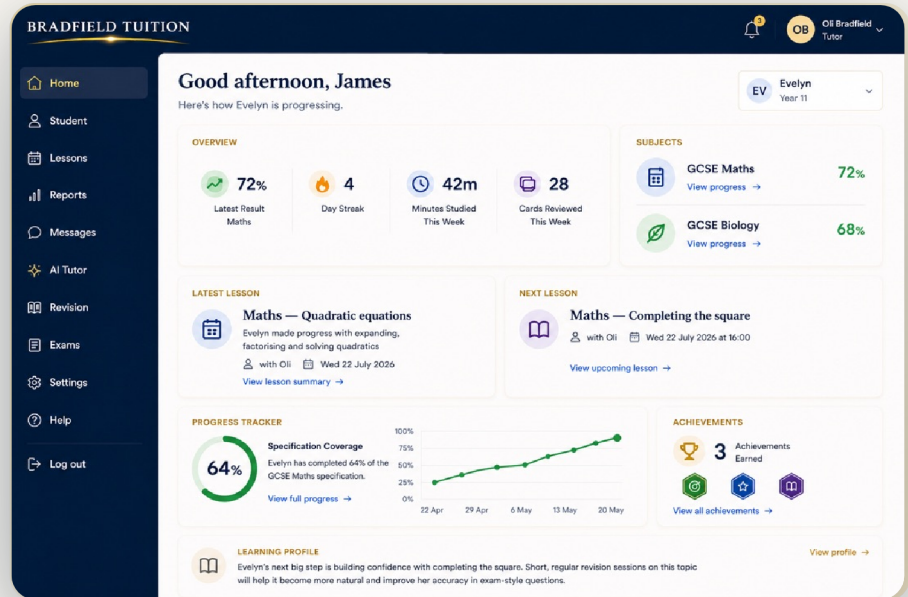

Clear direction. Thoughtful support. Better independent learning.

THE PARENT EXPERIENCE

Meaningful insight, without having to manage every task.

Parents can see how learning is progressing, understand what needs attention and stay connected to their tutor - without hovering over every piece of work.

See the full picture

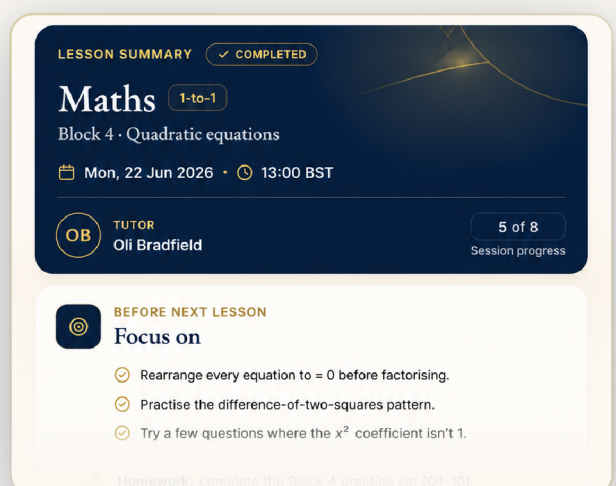

The parent dashboard brings together lessons, results, revision activity, specification progress and the next useful step.

Receive updates that mean something

Weekly learning updates turn lessons and independent study into a clear, honest summary of progress and priorities.

Know what happened after every lesson

Tutor summaries show what was covered, where support was needed and what to focus on next.

Students can message Oli or Maria between lessons.

Parents can view the family conversation and contact their tutor privately.

Clear insight. Honest communication. A genuine partnership.

Technology that strengthens great teaching. *Never replaces it.*

The Bradfield Tuition App connects every part of a student's learning journey, but the relationship with their tutor remains at the centre.

Every recommendation, lesson summary and next step is grounded in what we know about the individual student, their course and how they learn best.

Expert teaching

Lessons led by experienced, highly qualified teachers who know how to question, explain and build genuine understanding.

A connected learning journey

Preparation, lessons, revision, feedback and parent communication work together rather than existing as separate pieces.

Personal support

Students are known as individuals. The app helps us provide better continuity, but Oli and Maria remain responsible for their teaching and progress.

Information has never been easier to access.

*But understanding, motivation and performance still require **more than answers.***
